13.01.21 The ethos statements (with tennis ball backgrounds) were treated as list items in a similar way to the lists of links in the headers and footers of each page. This complicated way of writing the code caused the balls to move out of alignment with each other when the page adjusted to different screen widths.

31.01.21 – the code was simplified for the ethos statements. List elements were removed and responsive design code was moved to the CSS file (see next slide). (Font awesome icons were also moved in relation to statement text.)

```
143 @media only screen and (max-width: 768px) {
144     #ethos-three {
145         display:none;
146     }
147 }
148 @media only screen and (min-width: 768px) {
149     #ethos-three-small {
150         display:none;
151     }
152 }
```

Responsive design was controlled by CSS media query rule.
